

**To better understand this chart please watch the DVD Ready, Set....CLEAN!**

I explain how we use this rotation on the DVD. I originally created this in Microsoft Excel and this template is an example of a good place to start. The initials are each of my kids. The jobs are expected to be done everyday. Saturday jobs are to be completed before any leisurely activities. Sometimes we move the Saturday chores to another day if company is visiting or if Saturday is going to be a full day. Make a system that will work for you.

Spend the time to make an Action Chart because it will help with speed cleaning and everyone will know what is expected of them.
